DEPI React Frontend Web Developer

Training overview and my contribution

Training	DEPI React Frontend Web Developer
Timetable	120 contact hours plus 39 assignment hours
My contribution	Landing page, profile page and achievements page

Frontend foundations

HTML5 and CSS	12 and 9 hours: meaningful structure and visual layout
UX/UI and Bootstrap	3 and 12 hours: usable flows and responsive components
JavaScript and TypeScript	15 and 6 hours: interaction, asynchronous requests and types
React	33 hours: reusable components, state, props and hooks

Workflow subjects and capstone

Prompt engineering	6 hours: explain the task and verify the output
Backend introduction	9 hours: Node.js, Express and API communication
Quality and collaboration	Code style, documentation/testing and Git/GitHub: 3 hours each
Environment and project work	Docker basics and capstone: 3 contact hours each

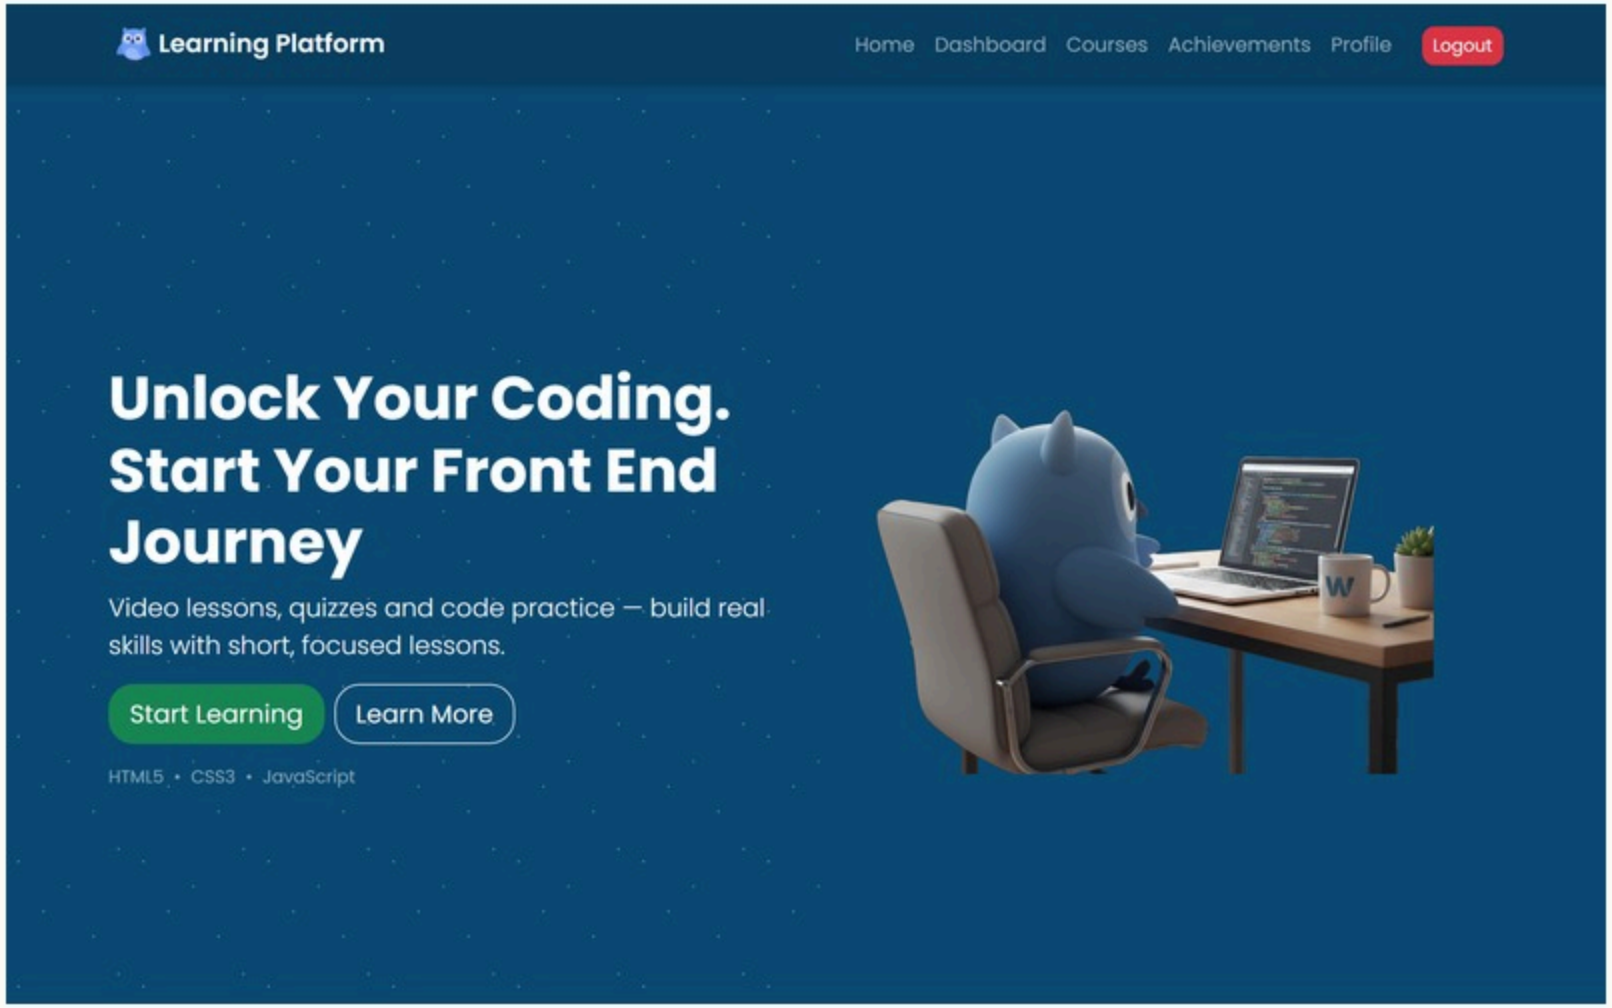

The learning experience we aimed for

Watch, try, and see progress

Our team built a prototype that brings lessons, quizzes and code practice together.

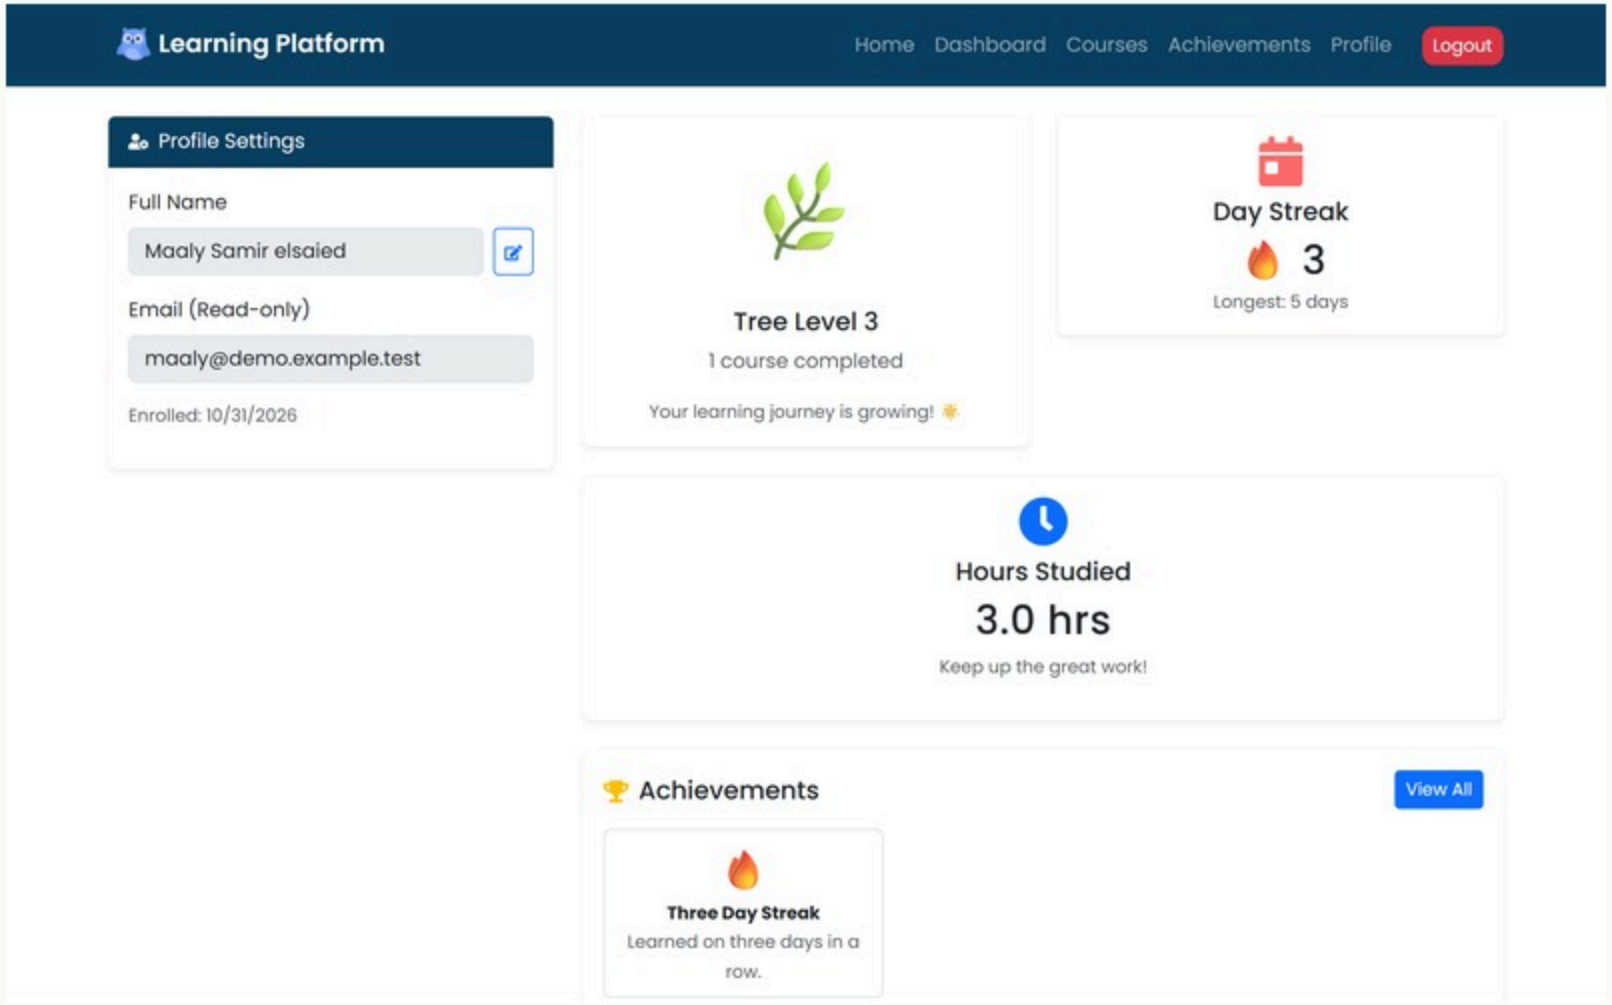

My screens introduce the platform and help learners see their progress.

My landing page

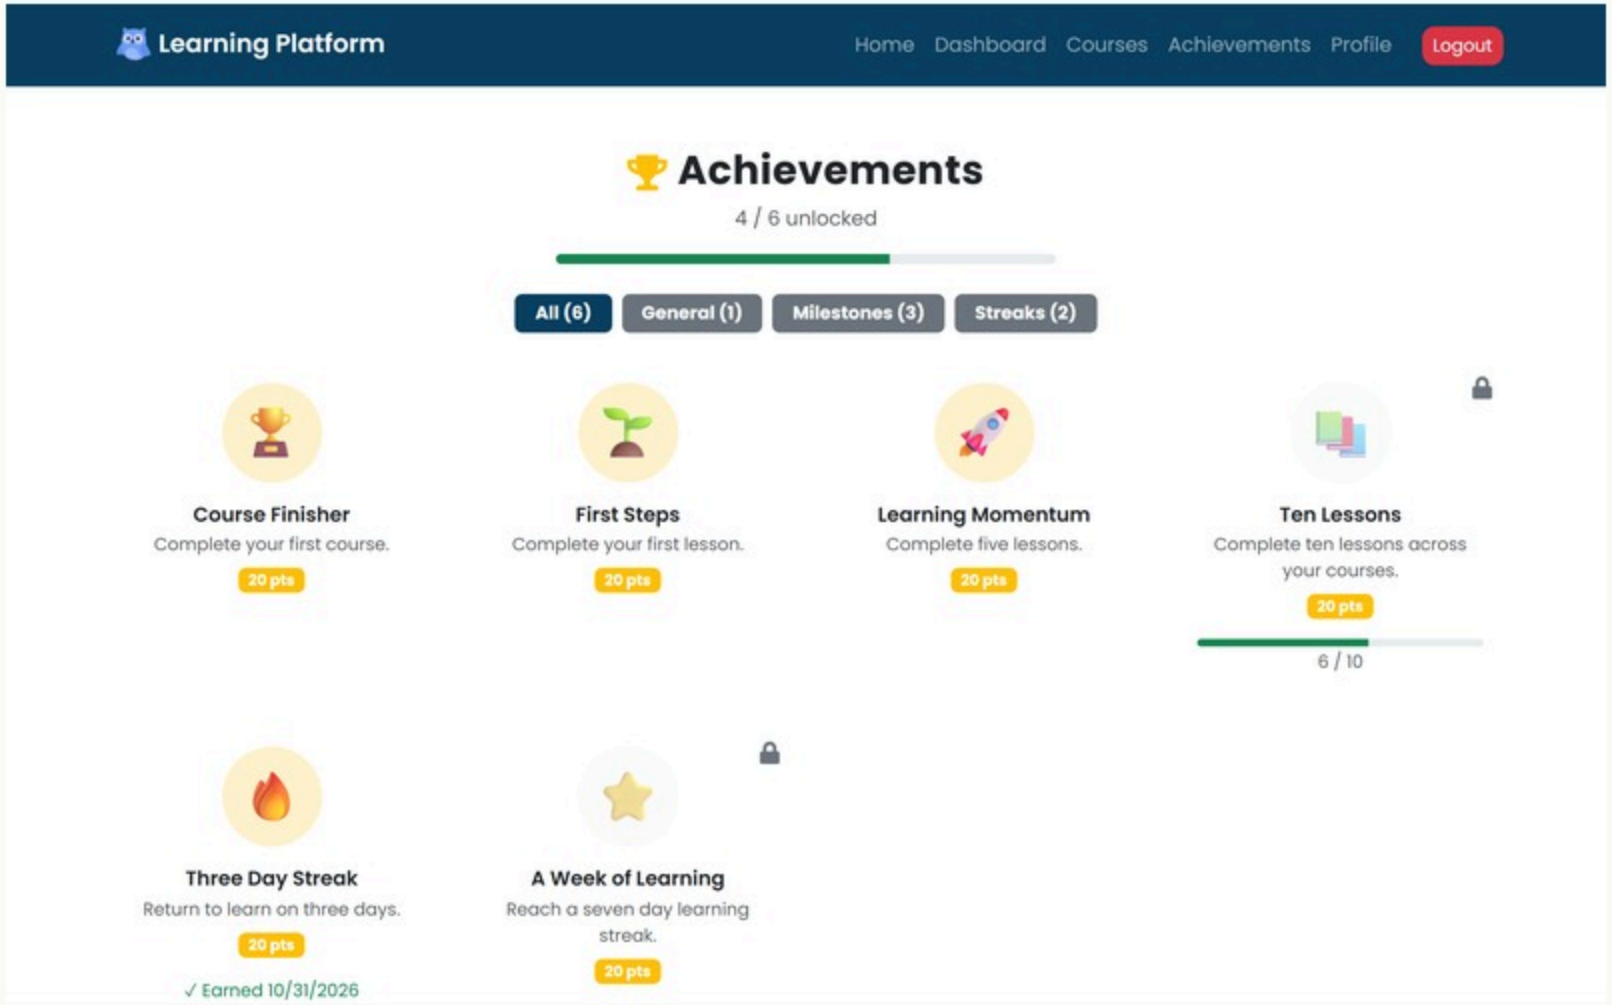

The landing page as a signed-in learner

My profile page

My profile page, signed in as Maaly

My achievements page

My achievements page: 4 of 6 unlocked

What the training gave me

Design to code	I can turn a page idea into a clean, responsive layout with React and Bootstrap
Interactive pages	I use state and events so a page reacts to the user, like editing a name
User experience	I plan clear buttons, loading messages and feedback for every action
Team habits	We split tasks, used Git and checked each other's parts before merging

Let me show it

Start	Double-click run.bat; it sets up the app and sample courses by itself
First impression	The landing page and its Start Learning button
My profile	Edit my name and see my streak, study hours and tree level
Achievements	Filter by category and open a locked goal to see the progress
